October 6, 2026

For the month of September 2026, the members of the Beaver Falls Fire Department received a total of three hundred fifty-two **(352)** hours of training (See attached). The highlights for the month are included below:

September 12/13: Fourteen (14) firefighters attended an Aerial Apparatus Operations class held in the city, instructed by Chief Stowe along Captains Crawford and Marcinko. This class was in preparation for a Driver/Operator Aerial certification exam scheduled for the end of September. Non drivers for T11 also attended this class as it gave them great training operating the power ladder.

Firefighters Kurt Ellefson and Jason Tyger: FFs Ellefson and Tyger traveled to Texas A&M (TEEX) to attend an Industrial Fire Brigade class at their training facility known as "Disaster City." This class helped prepare these members not only in industrial firefighting, but helped prepare them for incidents involving rail cars, tractor trailers and propane cylinders.

September 26 & 27: Eight (8) Tower 11 driver/operators or prospective driver/operators travelled to Butler County Community College to take their Driver/Operator Aerial certification exam. We know all 8 successfully completed their skills portion and will receive their written results in the coming weeks.

Respectfully submitted,

Chris Crawford
